Sudeep Kumar

Java Full Stack Developer | Spring Boot | Microservices | React | AWS
sudeepagrawal1999@gmail.com · +91-7488368218 · Linkedin · Github · Portfolio

SUMMARY

Java Full Stack Engineer with 3+ years building distributed systems using Spring Boot, Microservices, React, and AWS in enterprise fintech. Delivered measurable outcomes: 60–85% manual effort reduction, 70% data-sync accuracy gain, and 45% API latency improvement via MySQL tuning and Redis caching. Owns full delivery—from Hibernate/JPA schema design and Spring Security/JWT auth to React state management and AWS async pipelines.

TECHNICAL SKILLS

Languages	Java 11/17, JavaScript (ES6+), SQL, Python, HTML/CSS
Backend	Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, REST APIs, JWT, Multithreading
Frontend	React, Redux, Context API, Axios, Component Architecture, Responsive UI
Cloud & DevOps	AWS (EC2, S3, SQS, ASG), Docker, Jenkins, Git, CI/CD Pipelines
Databases	MySQL, PostgreSQL, Redis (caching), HQL, Query Optimization, Indexing
Testing	JUnit5, Mockito, Selenium, Cucumber (BDD), Integration Testing
Core Concepts	Microservices, API Gateway, Service Discovery, Circuit Breaker, Distributed Tracing

EXPERIENCE

Technical Specialist – Application Development *Aug 2026 – Present*
Birlasoft Limited, Hyderabad

- Contributing to the development and maintenance of backend services using Java and Spring Boot for a Synchrony Financial project.
- Assisting in developing and enhancing React-based UI components and integrating them with backend REST APIs.
- Supporting application maintenance by debugging issues, fixing bugs, and implementing minor enhancements across frontend and backend modules.
- Collaborating with team members to understand project requirements, follow existing code standards, and support application development and testing.

Software Development Engineer I *Jan 2025 – Aug 2026*
HighRadius Technologies, Hyderabad

- Delivered a full-stack email inbox platform (React + Redux + Spring Boot) processing 10,000+ daily emails—Hibernate/JPA customer mapping, AI-assisted drafting, and JWT-secured automated dispatch cut collections response time by **60%**.
- Designed microservices with REST + AWS SQS async messaging; implemented circuit-breaker patterns and distributed tracing (Spring Actuator), reducing cascading failure incidents by **40%**.
- Resolved thread-lock and concurrency bottlenecks on AWS EC2/ASG deployments; improved p95 latency by **35%** via connection pool and thread-pool executor tuning.
- Re-engineered cron-based batch services with multithreading and chunked MySQL data processing, cutting large-dataset job execution time by **40%**+ and enabling concurrent client-level processing at scale.
- Secured internal APIs using Spring Security with JWT token validation and role-based access control (RBAC), enforcing auth across 8+ microservice endpoints.

Associate Software Engineer *Jul 2023 – Dec 2024*
HighRadius Technologies, Hyderabad

- Built a Spring Boot Email Ingestion Service with Hibernate/JPA persistence, handling classification, deduplication, and routing of customer emails—improving collections workflow accuracy across 50+ enterprise clients.
- Shipped a Payment Commitment module with MySQL-backed transaction management and optimistic locking, reducing invoice reconciliation delays by **30%** for accounts receivable teams.
- Reduced manual data-sync intervention by **60%** and improved sync accuracy by **70%** via an AWS SQS-backed event-driven cron pipeline with dead-letter queue handling for failure recovery.
- Improved REST API response performance by **45%** through MySQL index optimization, HQL query restructuring, and a Redis caching layer—reducing average p95 latency from 420ms to 230ms.

PROJECTS

In-House Email Inbox Dashboard (Full Stack + Gen AI) *React, Redux, Spring Boot, JWT, MySQL, AWS SQS*
React + Redux frontend with JWT-secured Spring Boot backend; Hibernate/JPA persistence, AI intent classification, SQS async dispatch. Processes 10,000+ emails/day across enterprise clients.

B2B Invoice Management System (Full Stack) *React, Spring Boot, Hibernate/JPA, MySQL, Flask*
Invoice lifecycle platform with React + Axios UI, MySQL transaction management, and Flask ML service predicting payment timelines to improve AR forecasting accuracy.

EDUCATION

B.Tech in Computer Science & Engineering *2019 – 2023*
Lovely Professional University, Punjab
